HOW TO TEACH: PAW

DOGS FOR GOOD

Step 1

When your dog is in a sit position, tickle the back of one of your dogs front feet (choose the same leg to begin with!). As soon as she moves her foot then give her a treat.

Step 2

As she starts to predict you tickling her foot then just hold your hand a little further away so she starts to lift her paw herself. As soon as she does this then give her a treat.

Step 3

Now start to hold your hand a little higher so she learns to lift her paw to meet your hand.

Practice makes perfect!
Have fun!
