

Training Guide

HOW TO TEACH: ON YOUR BED

DOGS FOR
GOOD

Step 1

Choose a bed or blanket that you want your dog to lie down on. Stand a few steps away and throw some treats onto the bed to encourage him onto it.

Step 2

Instead of throwing the treats, now, introduce a point towards the bed – hopefully your dog will follow this. Once he's on the bed, then give him a treat.

Step 3

Once he is predictably going onto the bed when you point, hold off throwing the treats until he offers a down/sit position on the bed. As soon as he sits/lies down then give him some treats.

Step 4

When he is doing this well, then move slightly further away, point at the bed and he should go over to it then lie down, where you will give him some treats.

Practice
makes
perfect!
Have fun!
