

Training Guide

HOW TO TEACH: BEG

DOGS FOR GOOD

Step 1

Ask your dog to sit in front of you. Hold a treat just above his nose and give him a treat for sitting in this position whilst looking up.

Step 2

Raise the treat just slightly so he has to lift both front paws off the ground to get it. Don't raise it too high though as he may lose balance!

Step 3

As his balance improves, raise the treat a little higher so he is fully in the 'beg' position.

Step 4

Start to remove your lure (don't have a treat in your hand), instead use a hand signal and the word "beg". When he lifts his paws and goes into the position then give him a treat!

Practice makes perfect!
Have fun!
