

# DÖGTOBER

## STEP BY STEP GUIDE TO MAKING YOUR OWN DOG TOY!

Start by cutting little 5cm long slits at the base of your material. After you've cut your slits, just rip or cut along the slit to create fabric strips around 20cm wide. You should aim to have nine slits.

If using thick material, such as the green fleece shown here, just cut three strips 20cm wide and make little 5cm slits at the base.

If using fleece, roll it up loosely as shown; gather your material and tie off one end. If using thin material divide your nine strips into groups of three for braiding.

Start braiding down to the bottom. Once you've braided down to the other end, tie up the bottom. Use scissors to even up the top, bottom and knot.
